**Directions for Use**

**Turf (all grasses)**

Apply 5 pounds of 10-2-5 per 1000 square feet of turf area (1/2 lb of nitrogen per 1000 sq ft), 2 to 4 times a year as needed. For best results, adequate irrigation should be practiced after application and throughout the growing season.

**Shrubs (1 to 4 feet of canopy)**

Apply 1 pound of 10-2-5 around the base of the plant and lightly work into the soil, being careful not to disturb surface roots. Larger shrubs or stressed plants will benefit from larger feedings. Apply in Spring and Fall, thoroughly watering after each application.

**Trees**

For young or small trees (1 to 3 inch diameter) apply 2 to 3 pounds of 10-2-5 per inch of trunk diameter evenly under the canopy drip line. Increase the application rate to 3 to 4 pounds for larger trees. Apply in Spring and Fall, thoroughly watering after each application.
