**Use Instructions**

**Turf Maintenance**

Apply 8 ounces per 1000 sq. ft. every two weeks in 2 gallons of water on high profile sites like greens and tees. Increase rates based on the need for nitrogen and desired color response. 10 oz per 1000 sq. ft. provides 1/10 of a pound of nitrogen.

**Seed Establishment**

Apply 10 ounces per 1000 sq. ft. every week in 2 gallons of water, cutting back to a maintenance rate once the turf is established.

***Tank mix with other EarthWorks liquid products for maximum effectiveness.***

*Protein Plus can be tank mixed with most turf products, a bench test is always recommended.*
