

**No one who works in the turf industry is a stranger to the sign
of extreme heat stress on the plant.**

**The use of EarthWorks liquid organic products have been shown to help
superintendents get through the worst of what summer has to offer.**

EarthWorks **TURF SAVERS**

KICK RINSE-IN - Flushing sodium and bicarbonates out of the root zone on a monthly basis will help to fight sodium induced wilt, localized dry spots and assure that the roots are getting needed oxygen.
(Click here for data sheet)

SEA 3 - The newest of the EarthWorks bio-stimulants and soil conditioners,SEA 3 is designed to help manage fairways and sports fields providing powerful heat stress reduction and disease suppression in a cost effective manner. SEA 3 is formulated using the EarthWorks proprietary micronized humic acids but also seaweed extracts, fish emulsions, vermi-tea extractions and de-salinated sea water that provides minerals in a liquid application to help fight nutrient deficiencies and suppress pathogens.
(Click here for data sheet)

POTENT SEA - An additional 5 oz/1000 sq. ft. to the current spray program will help to provide needed carbohydrates to allow the plants metabolic process to function properly. In addition it will feed microbial populations and assure their support for the plant. Potent Sea is rich in kelp meal a known heat stress reducer. Beyond that, it is a highly engineered to provide much more in the way of carbohydrates, trace elements and soil conditioners. All of which become increasingly vital when the temperature rises.

Boost WP— Roots are the key to any Success in getting turf through high stress periods. BoostWP was designed to enhance root production. BoostWP also help the plant produce more photosynthetic activity. All of this will help the plant get through stress and recover faster. *(Click here for data sheet)*

***All of these EarthWorks products will tank mix with any fertilizer and will enhance any
fertilizer program. If you manage turf for a living and when hot weather hits,
look to Earthworks to Save your Turf!***
